Dr. Eugenia San Segundo

Distinguished Researcher
Department of Spanish Language &
General Linguistics @ UNED Madrid

UNED

About me

In March 2020 I joined the Department of Spanish Language & General Linguistics at the National University of Distance Education (UNED), Madrid, where I work as *Beatriz Galindo Junior Fellow*.

I teach several courses in the Degree in Spanish language & literature and from January 2021 an open teaching course on *Forensic Phonetics*.

My research interests include: Forensic Speech Science, formant dynamics, voice quality production and perception, dysarthric speech, discourse analysis, and the study of twins and related speakers.

Interests

- Applied Linguistics
- Experimental Phonetics
- Forensic Phonetics

Education

PhD in Speech Sciences, 2014

Spanish National Research Council (CSIC),
Madrid, Spain

Making Everything Easier!

Phonetics

FOR
DUMMIES[®]
A Wiley Brand

Learn to:

- Understand the science behind speech
- Grasp real-world applications of phonetics
- Transcribe speech using the International Phonetic Alphabet (IPA)
- Perform well in your phonetics course

Definition of *forensic* (Entry 1 of 2)

- : belonging to, used in, or suitable to courts of judicature or to public discussion and debate
// a lawyer's forensic skills
- : ARGUMENTATIVE, RHETORICAL
// forensic eloquence
- : relating to or dealing with the application of scientific knowledge to legal problems
// forensic medicine
// forensic science
// forensic pathologist

MATRICÚLATE GRADO Y MÁSTER

PLAN DE TRABAJO

En el cómputo de horas se incluyen el tiempo dedicado a las horas lectivas, horas de estudio, tutorías, seminarios, trabajos, prácticas o proyectos, así como las exigidas para la preparación y realización de exámenes y evaluaciones.

TEMA: Tema 1. La Lingüística y sus aplicaciones - 12 Horas

TEMA: Tema 2. Aprendizaje y enseñanza de lenguas - 12 Horas

TEMA: Tema 3. Traducción y mediación lingüística - 12 Horas

TEMA: Tema 4. Lexicografía - 12 Horas

TEMA: Tema 5. Planificación y políticas lingüísticas - 12 Horas

TEMA: Tema 6. Lingüística Forense - 24 Horas

TEMA: Tema 7. Diagnóstico y terapia de los trastornos del lenguaje y del habla - 12 Horas

TEMA: Tema 8. Lingüística computacional y tecnologías del habla - 24 Horas

PEC: Pruebas de evaluación continua - 3 Horas

Forensic Phonetics

- Speaker profiling

Forensic Phonetics

- Design and validation of voice line-ups

Forensic Phonetics

- Determining whether a recording has been edited
- Determining the content of a recording
 - Transcription >>> Disputed utterances

Best Practice Manual for the Methodology of Forensic Speaker Comparison

ENFSI-BPM-FSC-01
Version 01 – November 2021

5.1 Principles

The methodology of Forensic Speaker Comparison was developed for the purpose of analysing unknown speakers in telephone interceptions and other forensic and comparing them either among themselves and/or with known speakers.

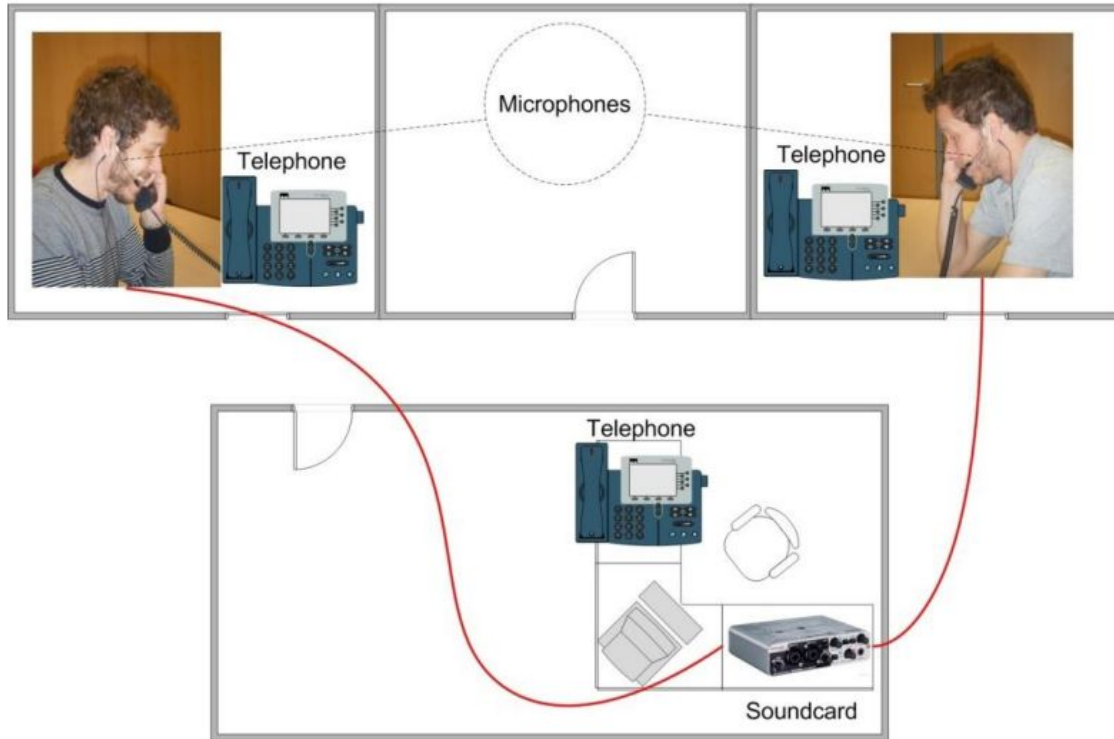

If there is more than one unknown speaker within one case scenario, unknown speakers must not be pooled automatically. They have to be analysed separately or at least checked in detail before being pooled.

A fundamental principle of this methodology is that a range of speech features can be analysed to capture the many dimensions on which speakers can be distinguished. According to the literature (e.g. [09], [10], [16]), speech features should be as independent from one another as possible to reach a high degree of speaker-discriminatory power. The relationship between intra- and inter-individual speaker variation determines the relevant discriminatory information. All findings are compared and evaluated on the basis of the (dis-)similarity and the typicality of speaker-specific characteristics. In this process the knowledge and competence of the experts play a substantial role. The expert has to make decisions at every step of the speaker comparison analysis using available scientific background information, as well as their experience. After the comparison and evaluation process a conclusion statement is given. The results of the examination are documented in an expert report.

Voice Quality

	FIRST PASS		SECOND PASS						
	Neutral	Non-neutral	SETTING	Moderate		Extreme			
				1	2	3	4	5	6
A. VOCAL TRACT FEATURES									
1. Labial			Lip rounding/protrusion						
			Lip spreading						
			Labiodentalization						
			Extensive range						
			Minimised range
